- A car racing advanced controller with realistic physics and drifting.
- Githup: https://github.com/Markzaki55/Velocity-Fury
- Youtube:https://www.youtube.com/watch?v=rI82pkqWu-s

News App
- "A simple news app using GetX as state management, fetching news articles from an API, serializing them, and displaying them in a Flutter mobile app."
- GitHup : https://github.com/Markzaki55/news_app/tree/main

Notee app
- "An app for saving personal notes. The app uses Bloc for state management and hydrated_bloc to persist the mode state. It integrates Firebase Authentication for user sign-up and sign-in processes, and it utilizes Firestore to store note data, including titles and widget colors. Additionally, it uses Firebase Storage to save profile pictures for users."
- GitHup: https://github.com/Markzaki55/noteeapp/tree/main
